## Healthcare Facilities That Have Implemented COVID-19 Electronic Case Reporting

Updated Dec. 11, 2020

[Print](#)

As of 8 December 2020

[PNG - 659 KB]

Footnote: Electronic case reporting (eCR) is the automated, real-time exchange of case report information between electronic health records and public health agencies. In partnership with the Association of Public Health Laboratories (APHL) and the Council of State and Territorial Epidemiologists (CSTE), CDC is rapidly onboarding healthcare facilities to eCR during the COVID-19 pandemic. As of December 8, 2020, more than 6,500 facilities are sending COVID-19 electronic initial case reports to public health using eCR.

## More information about eCR
